

Table Cells

Alignment

Rows one and two are reference rows, left- then right-aligned throughout; row three is tall and row four is flat, which are the two cases a vertical alignment has to be right in.

leftA	leftB	leftC	leftD	leftE
rightA	rightB	rightC	rightD	rightE
cinder marble ripple candle timber pebble willow socket ribbon garden hollow minnow	centred	righted	middled	bottomed
flatA	flatB	flatC	flatD	flatE

Cell styles

asciidoc cell	default cell	<i>emphasis cell</i>	header cell	literal cell	mono cell	strong cell	verse cell
------------------	--------------	--------------------------	------------------------	-----------------	-----------	--------------------	------------

An AsciiDoc cell keeps the page's alignment

An AsciiDoc cell holds a whole document of its own, and a left-aligned one is inked at the page's own alignment rather than flush left, which this theme justifies.	A plain cell holds a run of text, and a left-aligned one is inked flush left however the page is set, so its lines end wherever the words do.
---	---

A footer row

Head one	Head two	Head three
Body one	Body two	Body three
Foot one	Foot two	Foot three

Sized by content

short	a much longer cell than the other one
xx	yy

Sized by weight

alpha	beta	gamma
one	two	three
