

Paragraph numbers in the margin

1. Ordinary prose at the full measure, whose number belongs in the left page margin.
2. Two item A sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
3. Two item B sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
4. Two item C sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
5. Two item D sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
6. Two item E sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
7. Two item F sits inside the region and wraps within the narrow column measure, running on a little so the column boundary is unambiguous.
8. Prose between the regions, back at the full measure. The three-column region below is short enough to balance across all three columns, so the rightmost one is populated and its right-margin numbers are pinned alongside the interior column's inline fallback.
9. Three item A is deliberately short.
10. Three item B is deliberately short.
11. Three item C is deliberately short.
12. Three item D is deliberately short.
13. Three item E is deliberately short.
14. Three item F is deliberately short.
15. Filler paragraph 1, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
16. Filler paragraph 2, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
17. Filler paragraph 3, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
18. Filler paragraph 4, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
19. Filler paragraph 5, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
20. Filler paragraph 6, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
21. Filler paragraph 7, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
22. Filler paragraph 8, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.

of vertical space as the page fills toward its foot.

23. Filler paragraph 9, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
24. Filler paragraph 10, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
25. Filler paragraph 11, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
26. Filler paragraph 12, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
27. Filler paragraph 13, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
28. Filler paragraph 14, long enough to wrap across the full measure and consume a predictable amount of vertical space as the page fills toward its foot.
29. This paragraph is pushed onto a page of its own by the filler above. Its number must travel with it and appear beside it, not stranded at the foot of the previous page.
30. Final prose.
