

Wide Tables On Their Own Page

Prose before the table, on a normal portrait page.

Column one row 0	Column two row 0	Column three row 0	Column four row 0	Column five row 0	Column six row 0
Column one row 1	Column two row 1	Column three row 1	Column four row 1	Column five row 1	Column six row 1
Column one row 2	Column two row 2	Column three row 2	Column four row 2	Column five row 2	Column six row 2
Column one row 3	Column two row 3	Column three row 3	Column four row 3	Column five row 3	Column six row 3
Column one row 4	Column two row 4	Column three row 4	Column four row 4	Column five row 4	Column six row 4
Column one row 5	Column two row 5	Column three row 5	Column four row 5	Column five row 5	Column six row 5

Prose after the table. This must be back on a normal portrait page — a regression that changed the page geometry and never restored it would leave the whole rest of the document landscape.

Column one row 0	Column two row 0	Column three row 0	Column four row 0	Column five row 0	Column six row 0
Column one row 1	Column two row 1	Column three row 1	Column four row 1	Column five row 1	Column six row 1
Column one row 2	Column two row 2	Column three row 2	Column four row 2	Column five row 2	Column six row 2
Column one row 3	Column two row 3	Column three row 3	Column four row 3	Column five row 3	Column six row 3
Column one row 4	Column two row 4	Column three row 4	Column four row 4	Column five row 4	Column six row 4
Column one row 5	Column two row 5	Column three row 5	Column four row 5	Column five row 5	Column six row 5

Final prose, portrait again.

Text in columns before the marked table.
