

Styled Inline Context

The theme sets the codespan bold and gives it a chip, so this document says which of the two the renderer forces and which it still leaves to the markup around the construct.

*Table 1. A caption in italic, with a **codespan** the theme sets bold*

Action	Key
Delete the line	Ctrl+D

Operator	Meaning
d	Default paragraph text

A paragraph carrying *emphasis around **slanted** text* and, outside it, plain **upright** text.
